

STAUFF Tube Bending and Saw Device 6-12mm

Product Description

STAUFF offers a combination manual tube sawing and tube bending kit suitable for stainless steel hydraulic tubes with 6, 8, 10 or 12 mm outer diameter. The bending/saw device can simply be fastened with a vice or attached directly to a workbench worktop with up to 35 mm thickness. A fine-toothed hacksaw (not included) is recommended for sawing to achieve a square cut of the tube.

The kit comes with a robust metal case designed for handling and use in heavy-duty conditions and contains the bending/saw device, three steel bending rollers and a bending lever. A separate compartment offers space for a manual deburring tool, which can be purchased separately using item no: 6100156687.
